SKILLS

● **Language**

Java, Javascript, HTML/CSS.

● **Frameworks/Libraries**

Sping boot, Node.js (Express), Bootstrap 5, ReactJS, Redux

● **Source control**

Git

INTERESTS

Soccer, volleyball, music.

OBJECTIVE

While studying automotive engineering technology, I had the opportunity to come into contact with programming and found myself particularly interested in web programming. That's why I want to be a web developer. I want to learn and contribute the value created to my organization. I hope in my backend developer career I will be a senior developer in the next 4 years.

EDUCATION

● **HCMC UNIVERSITY OF TECHNOLOGY AND EDUCATION**

Major: Automotive EngineeringTechnology   Aug 2017 - Aug 2021

- GPA: 7.7/10

PROJECT

● **Strava Advanced API**

Back-end   May, 2023 **-** Jun, 2023

Source:
- https://github.com/tma-inter/strava-api

Description: Connect to the Strava app, using the Strava app api set as part of my app api. Get user information (with permission from the user), thereby creating a ranking of user activity.

Responsibility:
- Create a link with the Stava app.
- Automatically generate access token when user allows
- Create worker update access token, worker update work .
- Implement APIs rakings, active, ...

Technologies:
- Java Spring boot, MySQL, JUnit 5, Docker.

● **Tiktok UI**

Front-end   Dec, 2022 **-** Jan, 2023

Source:
- https://github.com/phuc010299/tiktok-ui.git

Description: A project made for the purpose of practicing and improving knowledge of ReactJs.

Responsibility:
- clone the homepage of tiktok.com
- Use API for searching, and displaying accounts, and videos, ...

Technologies:
- Reactjs. HTML/CSS-scss

- **Website booking care**

Back-end, Front-end   Oct, 2022 - Dec, 2022

Source:
- Frontend: https://github.com/phuc010299/bookingcare-frontend.git
- Backend: https://github.com/phuc010299/bookingcare-backend.git

Description: The website allows users to choose a doctor by hospital or specialty to book an appointment with that doctor at a specific time. The website also allows doctors to schedule appointments and manage patients.

Responsibility: Clone the interface of bookingcare.comUsers authentication. Create API for user CRUD operation. Create an API and call to display information about doctors, specialties, hospitals, doctor's schedules, appointment booking, and email confirmation

Technologies:
- Frontend: Reactjs + Redux. HTML/CSS-scss/Bootstrap4 (reactrap)
- Backend: Node.js (Express) + MySql (Sequelize)

- **Website booking care**

Back-end, Front-end   Oct, 2022 - Dec, 2022

Source:
- Frontend: https://github.com/phuc010299/bookingcare-frontend.git
- Backend: https://github.com/phuc010299/bookingcare-backend.git

Description: The website allows users to choose a doctor by hospital or specialty to book an appointment with that doctor at a specific time. The website also allows doctors to schedule appointments and manage patients.
